THE R.I.S.E.™ ROADMAP

PRACTICAL PLANNING TOOLKIT

R - RESTORE

Insurance Review Checklist

Know what you have before deciding what you need.

BUILD YOUR OWN PLAN • 25 MINUTES

What you will walk away with

Build one clear list of your policies and the questions you need answered.

BEFORE YOU START

Your medical card, life policy summary, employer benefits and any insurance documents you can find. Do not share policy numbers in public chats.

Your 5 steps

01 **See your situation**

02 Work out the numbers

03 Compare choices

04 Plan 30 days

05 Review your progress

See your situation

Medical cover helps with eligible healthcare costs. Life cover may pay money after death. These are not the same benefit.

STEP 1 OF 5 UNDERSTAND

People who depend on me

Partner, children, parents or others

My main monthly family costs (RM)

Home, food, utilities, other essentials

Debts that would still need paying (RM)

Home or other outstanding debts

Employer insurance included?

Yes / No / Not sure

List what you already have

Cover type	Policy or employer	Amount / what it pays

REMEMBER

A medical card does not automatically mean your family has enough life cover. Some policies include both.

THREE QUESTIONS TO KEEP IN MIND

1. Do you have medical coverage, life coverage, both or neither?
2. Who depends on your income or care?
3. What part of your current policy is unclear to you?

Work out the numbers

This is a conversation starter, NOT a calculation of how much insurance you must buy. Use estimates if needed.

STEP 2 OF 5

DO THE MATHS

A SIMPLE EXAMPLE

EXAMPLE: If essential family costs are RM3,500 per month, 12 months would be RM42,000 in living costs before considering debts, other income, savings or policy benefits.

Now use your own numbers

Essential household costs each month (RM)

Number of months I want to review

Costs for that period (RM)

Monthly costs times months

Savings or family income that might help (RM)

Existing life coverage I can confirm (RM)

WHAT YOUR NUMBER TELLS YOU

Numbers alone do not prove a gap. Check what each benefit pays, to whom, for how long and under what conditions.

A NOTE BEFORE YOU ACT

Do not cancel or replace a current policy based on this worksheet. Check waiting periods, exclusions and changes in cost first.

Compare your options

A good next step should fit your money, time and responsibilities - not only your hopes.

STEP 3 OF 5 EXPLORE

1 **Check my policy details**

Ask the insurer for the latest benefit summary, exclusions and premium information.

2 **Compare family responsibilities**

Think about dependants, debts, other family income and cash available.

3 **Request a full needs review**

Discuss confirmed benefits and possible gaps with an appropriately authorised person.

Compare your choices

What is covered now?

What is still unclear?

What will it cost?

Before you decide, ask yourself

- [ ] What is my medical annual limit and what is excluded?
- [ ] How much life coverage is confirmed, and who receives it?
- [ ] Does employer cover stop if I leave my job?

Your 30-day action plan

Four small weekly steps are usually easier to keep than one big promise.

STEP 4 OF 5

TAKE ACTION

WEEK 1

Find the documents

Collect medical, life and employer benefit summaries.

My step:

WEEK 2

Fill your cover list

Write what each policy actually covers; mark unknown items.

My step:

WEEK 3

Ask the insurer

Clarify exclusions, renewals, premium changes and claims process.

My step:

WEEK 4

Review needs

Compare your cover with family commitments; seek a proper review if needed.

My step:

Make it real

My first action in the next 48 hours:

Date I will check my progress:

Review & take the next step

Come back after 30 days. A useful plan changes when life or the numbers change.

STEP 5 OF 5

KEEP IMPROVING

What I check	Known today?	Checked later?
Medical benefits & exclusions		
Life cover amount		
Who receives the benefit		
Cost & renewal terms		

Your reflections

Which coverage was different from what I assumed?

What could my family still struggle to pay?

What question should I ask first?

WHEN IT IS WORTH GETTING HELP

A professional can help assess affordability, suitability and overlapping cover. Ask for a clear explanation, not a rushed product pitch.

Good questions to bring to a review

- Based on my existing cover, what is already working well?
- What gap, if any, matters most for my family and budget?
